

Drum Cart

Drum not included
Model # DCYWR35SHSQ25R

Our most popular filter cart is the Drum Handling Unit. The cart is very practical and it reduces equipment costs by allowing one piece of equipment to move, dispense and filter oils out of a 55-gallon drum.

Take the drum... or leave the drum behind!

Air powered pumps are an excellent alternative to electricity. The air motor & direct coupled pump delivers stable flow, without oil surge.

Chime hook holds drum to cart

For true closed loop oil handling, which gives you better control of contamination through ingress, add one of our Breather Kits

www.y2kfluidpower.com

25 ft electric cord reel and 1 HP motor, many different pumps including air/oil or manual.

Water removal and 3um filters. Also 1, 6, 10 and 25.

Specs: Electric:
1 HP Motor with TEFC frame - 115 VAC
1, 2.5, 5 & 10 GPM Pump
Chime hook holds drum to cart
Two stationary wheels & two swivel casters
25 ft electric cord reel
Water removal pre-filter
3 um secondary filter
Differential visual indicators
7 ft transfer hoses with quick disconnects
(3/4" suction & 1/2" discharge hoses)

Our drum handling cart can carry a drum wherever it is needed and pumps oils out of the drum. Manuevers easily and makes oil handling a very simple task.

All Y2K Filter carts come standard with Visual Delta P Indicators. When the color changes, please change the element.
