

Most Versatile Tote made!

T3 Totes

This tote can fill itself, off-line filter the oils in the tote, pump the oils out of the tote (through the series filters) and if needed this tote can be used as an off-line filter cart!

Model # T3Y335ZH5Q25RBCOZ

For added versatility, our totes allow for an electrically operated pump, air operated, diaphragm pump or rotary hand pump.

Oils can be poured in through the top or pumped into the reservoir, through the on-board pump. All oils pumped are filtered through the water removal and 3um Absolute filters. They can be manufactured with a variety of different filters, flow rates and options.

For true closed loop oil handling, which gives you better control of contamination through ingress, add one of our Breather Kits
